

On-demand auditor for third-party SaaS against European regulatory frameworks.

Classifies a SaaS tool against five European frameworks — **GDPR, DORA, NIS2, Schrems II, EU AI Act** — from its name alone. Result in a single call: a structured verdict RED ORANGE GREEN, maturity score, remediation plan, Cloud Act exposure analysis.

HOW IT WORKS

FRAMEWORKS COVERED

5

REGION

europe-west1

ENGINE

gemini-2.5-flash

AUDIT CACHE

Firestore 30d

Input, processing, output

INPUT

`toolName: string`

`lang: "en" | "fr"`

No onboarding. No OAuth connector. No access to the client IS.

PROCESSING

Localized prompt + SYSTEM_INSTRUCTION server-side. Gemini 2.5-flash with `responseMimeType: application/json`, tolerant parsing, Firestore cache.

OUTPUT

JSON object: `tools[], gapAnalysis, riskAwareness, platformGrid, sources[]`.

Five European frameworks, one call

FRAMEWORK	REFERENCE	WHAT IS EVALUATED
GDPR	2016/679	Data location, DPA, legal bases, transfers outside the EU
Schrems II	CJEU C-311/18	US Cloud Act exposure, SCCs, supplementary measures
DORA	2022/2554	ICT TPRM coverage, resilience, ICT incident reporting
NIS2	2022/2555	Cyber obligations for essential and important entities
EU AI Act	2024/1689	Training policy, model risk class, injection clauses

What the product does differently

Zero onboarding

No OAuth, no SCIM, no connector. The audit starts from the sole input of a tool name.

Single-prompt aggregation

Five frameworks evaluated in a single LLM call, where GRC platforms handle each as a separate module.

Typed sovereign directory

23 EU cloud providers with cloud_act_exposure, sovereigntyScore, SecNumCloud / HDS / C5 certifications.

europe-west1 hosting

Cloud Run, Firestore and Firebase Hosting located in the EU. Gemini key stored in EU Secret Manager.

Zero-secret frontend

generate-env.js verifies that no sensitive variable is injected into the client bundle.

Native FR / EN bilingual

Localized prompt engineering (CNIL anchoring on the FR side) + fully translated UI.

§9 · FAQ

Frequent questions

▶ **Which regulations are covered?**

▶ **Is this a replacement for Vanta or Drata?**

▶ **Can the AI be wrong?**

▶ **Where is the data hosted?**

Start an audit

Enter the name of a SaaS. No configuration. No API key needed.

HOSTING LOCATION

AWS (US + EU) — Salesforce subprocessor

AI TRAINING POLICY

Conditional — depends on plan tier.

Reasoning. US-headquartered (Salesforce). Cloud Act exposure persists despite EU hosting. SCCs required; risk never zero without SecNumCloud.

⚠ **Trust, but verify.** This verdict is generated by Gemini 2.5-flash and may contain hallucinations. Validate versions, clauses and jurisdictions against the vendor's signed DPA before any decision.
